Dear Colleagues,

It is my great pleasure to invite you to our annual meeting on Peritoneal Surface Malignancies that will be held in Mumbai this year. Like the preceding years, this meeting addresses the needs of both beginners & experienced Peritoneal Surface Oncologists providing a comprehensive update on the current standards of care in this field as well as the emerging therapies.

We are privileged to have Dr. Paul Sugarbaker & Dr. Yonemura with us who will be giving a live surgical demonstration. It is a great opportunity to learn from & interact with the person who has developed the principles of peritoneal cancer surgery. We are equally privileged to have with us Prof. Olivier Glehen from Lyon, France, Prof. Yutaka Yonemura from Osaka, Japan, Dr. Francois Quenet from Montpelier, France & Prof. Sang-Yoon Park from National Cancer Center, Korea.

Extending over two & half days, the program will cover the basics, topics of debate & the new developments in this field. Peritoneal surface oncology is a discipline - it's not just the science but the 'approach' & there cannot be a better meeting to attend for all those seriously interested in this field.

We look forward to your participation in this academic endeavour.

On behalf of Organising Team,

Dr. Sanket Mehta
Organising Chairman
Professor Paul Hendrick Sugarbaker needs no introduction. He is Secretary-General of PSOGI (Peritoneal Surface Oncology Group International) & Director of Center for Gastrointestinal Malignancies, MedStar Washington Hospital Center. With over 800 articles to his credit, he is the pioneer in the technique of CRS + HIPEC & EPIC. He has trained hundreds of surgeons & is responsible for popularising this technique all over the world. He has been largely influential in developing & supporting this activity in India & has visited India on several occasions to give live demonstration surgeries to teach this technique.

Prof. Yonemura is a prolific surgeon & researcher from Osaka, Japan. He has over 290 publications to his credit in a career spanning 41 years. He has published extensively on stomach cancer & peritoneal metastases from stomach cancer. He is the pioneer in the development of NIPS as a neo-adjuvant therapy for peritoneal metastases from stomach cancer, besides having the largest experience in HIPEC in stomach cancer. Besides clinical studies, he has conducted several basic sciences studies on the pathogenesis & pattern of spread of peritoneal metastases.
Professor Olivier Glehen, MD, PhD is the Head of the General & Oncologic Surgery Department in Centre Hospitalier Lyon Sud (Hospices Civils de Lyon) & in Lyon Sud Charles Mérieux Medical Faculty since 2012. He is the Director of the Peritoneal Carcinomatosis Research Group (Claude Bernard Lyon 1 University). With over 330 articles to his credit, he is one of the most influential researchers in the field. His experience with the RENAPE group & PSOGI makes him an invaluable teacher & pioneer in newer techniques in the treatment of peritoneal surface malignancies.

Dr. François Quénet is an Expert in digestive & hepatobiliary surgery. He is the Head of HPB & peritoneal surface malignancies unit in Institut du Cancer de Montpellier Val d’Aurelle, France. He has over 250 scientific articles to his credit in the field of CRS+HIPEC & hepatobiliary surgery. He is the principal investigator of the recently concluded Prodigé 7 study that laid down the background for CRS in Colorectal cancer. He is an integral part of the RENAPE & PSOGI groups & is also involved in the research & application of newer techniques like NIPS & PIPAC in colorectal cancer.
Prof Park Sang Yoon is the Doctor/Principle Scientist at the Center for Uterine Cancer, National Cancer Center Korea, & Adjunct professor at the Department of O&G, at Seoul National University, Seoul, Korea.

A keen researcher, Prof Park is heavily involved in clinical trials related to Ovarian Cancer, & has published heavily in international journals on ovarian cancer. With 167 publications to his credit, he is a pioneer & a world-renowned leader in gynaec-oncology. Apart from clinical research, he is involved in pre-clinical & molecular research in this subject.

Dr. Faheez Mohamed has been involved in research on peritoneal surface malignancy & has published extensively on the subject. He is currently Consultant Surgeon at the National Commissioning Group Pseudomyxoma Peritonei Centre at the Basingstoke & North Hants Foundation Trust, the centre with the largest experience in PMP in the world.

Mr Mohamed is a Consultant Colorectal Surgeon at the BNHFT & forms one of five partners of the Basingstoke Colorectal Partners at The Hampshire Clinic.
Dr. Teo is visiting Consultant National Cancer Centre. Dr. Teo is skilled in the management of stomach & colorectal cancers, sarcoma, melanoma, & peritoneal disease. She is the first President of the Asian Peritoneal Surface Malignancy Group with her vast experience in Cytoreductive Surgery & Intra-peritoneal Chemotherapy (CRS & HIPEC) for the treatment of peritoneal disease.

Simon studied Health Science and Medical Science at the University of Nijmegen and an additional year for Epidemiology and Health Law at the University of Utrecht. He finished his PhD on Chronic pain after inguinal hernia repair in 2008. After a fellowship Abdominal Surgery at the Catharina Hospital in Eindhoven, he joined the staff in 2010. His main interests are bariatric, HIPEC and abdominal wall surgery. He’s head of the residents and organizer of the Obesity Center for annually thousand metabolic procedures. He co-founded and is Together with colleague de Hingh responsible for the treatment of peritoneal carcinomatosis treatment at the Catharina Cancer Institute. He contributed to currently 140 peer reviewed articles and co-promoted 6 PhD’s so far. He loves to travel around the world and to listen to chaotic metal guitar music.
Dr. Mohammad Alyami is a Consultant of General, Colorectal, and Oncology Surgery working at King Khalid Hospital, Najran, Saudi Arabia since 2018. He is the head of department of Surgery & the Head of Oncology Center, at the same hospital. He is in charge of the treatment of Peritoneal Surface Malignancies offering CRS, HIPEC and PIPAC in addition to the colorectal and upper GI cancer surgery.

His research interests include PIPAC, HIPEC, Colorectal Cancer. He has published more than 35 original and invited papers and he is a member in multiple international societies.
